

Press Release

Exentis Group AG - Profitable growth in the 1st half of 2021

- ◆ **Shipping of numerous Exentis 3D systems and concluding further licensing agreements**
- ◆ **Revenue of CHF 9.55 million and earnings before interest and taxes (EBIT) of CHF 2.39 million generated**
- ◆ **Full-year outlook: Continued double-digit profitable growth**

Stetten, Switzerland, August 4th, 2021 - Exentis Group AG, leading provider of a sustainable 3D technology platform, the Exentis 3D Mass Customization®, successfully concluded the first half of the 2021 financial year.

Numerous Exentis 3D development and production systems have been shipped and further licence agreements have been concluded, generating a revenue of CHF 9.55 million. This revenue for a single half-year is above the best full-year revenue achieved in 2018 so far.

Earnings before interest and taxes (EBIT) amounted to CHF 2.39 million. This confirms the successful business model as well as the Corona-related necessity to optimise costs.

The complete financial statements in both German and English can be found at www.exentis-group.com/de/investor/resultate-und-publikationen.

Klaus Radakovics, CFO of Exentis Group AG: "For the full year, Exentis expects to continue its double-digit profitable growth, partly by shipping the first Exentis 3D production systems to the United States."

About Exentis

As a leading provider of a sustainable 3D technology platform, Exentis offers large-scale production of components with free choice of materials and ultra-fine geometries. Industrialized Additive Manufacturing creates a new level of flexibility in 3D manufacturing processes and replaces time-consuming and costly tooling production when using established manufacturing technologies. Exentis optimizes the entire process chain from the development project to the industrial production of millions of components for the application fields of industrial e-mobility, fuel cells or med-tech, among others. This enables the customer to decide between production of the components at Exentis or in-house production with a manufacturing licence when purchasing the Exentis 3D development and production systems.
