

## Press Release

### **PHENOGY acquires first Exentis 3D system**

- ◆ **PHENOGY acquires first Exentis 3D system in addition to exclusive production license**
- ◆ **Exentis 3D technology platform to be used for large-scale production of sustainable energy storage systems**
- ◆ **Delivery of the 3D system to PHENOGY still in 2022**

**Stetten, Switzerland, 20 December 2022** – Exentis Group AG, provider of the only 3D technology platform worldwide that enables industrial large-scale manufacturing, has sold the first 3D system to PHENOGY.

PHENOGY has been Exentis' exclusive licensee for large-scale additive manufacturing of energy storage systems since 2021. The company aims to develop safe, reliable and sustainable alternatives to existing energy storage systems and to become a global player in this area.

Dr. Gereon Heinemann, CEO of Exentis Group AG: „Our 3D technology platform will enable PHENOGY to manufacture millions of sustainable and versatile energy storage systems – another great example for industrial applications in our strategic business segment New Energy, which also includes applications for e-mobility or fuel cells.”

The first 3D system to PHENOGY will still be delivered in the 2022 financial year.

## **About Exentis**

As a solution provider, Exentis has the only proprietary 3D technology platform worldwide that allows industrial large-scale production. Industrialized Additive Manufacturing is universally applicable. For industrial or cleanroom applications. With free choice of materials, such as metals, ceramics, polymers, pharmaceutical or bio-printing products. Highly flexible 3D production technology combines rework-free component geometries with advantageous cost-benefit ratios. The cold printing process in use is sustainable and conserves materials as well as resources. Our customers, the Exentis 3D community members, can choose between exclusive in-house manufacturing under license agreements or having Exentis produce millions of applications for them as a contract manufacturer.
