

Press Release

Ohnhäuser acquires third Exentis 3D production system

- ◆ **Ohnhäuser being the exclusive contract manufacturer for Exentis since 2019**
- ◆ **Significant expansion of contract manufacturing capacity for Exentis customers**
- ◆ **Series production capacity increased to more than 10 million parts per year**

Stetten, Switzerland, 17 January 2023 – Exentis Group AG, provider of the only 3D technology platform worldwide that enables industrial large-scale manufacturing, has sold a third 3D production system to Ohnhäuser GmbH, marking a successful start into 2023.

Ohnhäuser, based in Wallerstein, Germany, has already been operating as exclusive contract manufacturer for Exentis since 2019 and, with its more than 300 employees, is characterized by the highest certified quality standards and process reliability. Ohnhäuser will also use the third Exentis 3D production system to manufacture industrial applications in the material classes metal, ceramics and polymers. The additional 3D production system will increase contract manufacturing capacity for Exentis 3D community members, the customers of Exentis, to more than 10 million parts per year, taking into consideration the Wallerstein site only.

Dr. Gereon Heinemann, CEO of Exentis Group AG: “We highly appreciate Ohnhäuser as a reliable partner and quality manufacturer at the highest level. The significant capacity expansion will allow us to meet the increased demand for industrial parts produced with our 3D technology, regardless of the material.”

Hermann Rieger, Managing Director of Ohnhäuser GmbH: “In our successful 65-year company history, we have always focused on groundbreaking innovative manufacturing technologies. For the Exentis 3D technology platform we have established a designated production area of 5,500 m² at the company site ‘Altes Schloss’ in Wallerstein.”

The additional high-volume 3D production system is expected to be delivered already in the first quarter of 2023.

About Exentis

As a solution provider, Exentis has the only proprietary 3D technology platform worldwide that allows industrial large-scale production. Industrialized Additive Manufacturing is universally applicable. For industrial or cleanroom applications. With free choice of materials, such as metals, ceramics, polymers, pharmaceutical or bio-printing products. Highly flexible 3D production technology combines rework-free component geometries with advantageous cost-benefit ratios. The cold printing process in use is sustainable and conserves materials as well as resources. Our customers, the Exentis 3D community members, can choose between exclusive in-house manufacturing under license agreements or having Exentis produce millions of applications for them as a contract manufacturer.

About Ohnhäuser

Ohnhäuser is a modern, medium-sized company with over 300 highly skilled employees and a successful company history spanning more than 65 years. Through its expertise, flexibility and highest quality standards, the company has established itself nationally and internationally as a premium supplier of components and assemblies for the aerospace industry (with respective certifications), for mechanical and plant engineering as well as for car manufacturing. Highly innovative technologies, modern machinery and committed employees are the most important success factors. Sustainable management and the foresightful use of resources form essential cornerstones of the corporate philosophy.
