

## Press Release

### **Whitecell receives two Exentis 3D production systems**

- ◆ **Installation of two Exentis 3D production systems at Whitecell's production site in Northern Germany**
- ◆ **Large-scale manufacturing of applications for fuel cells**
- ◆ **Whitecell benefits as a licensee from Exentis' technological advantage**

**Stetten, Switzerland, March 18, 2025** – Exentis Group AG, provider of the world's only 3D technology platform enabling industrial large-scale manufacturing, has installed two Exentis 3D production systems at Whitecell's production site in Clausthal-Zellerfeld, Northern Germany.

Whitecell utilizes the Exentis 3D technology platform as a licensee exclusively for the large-scale production of innovative applications for fuel cells.

Installation of two Exentis 3D production systems at Whitecell's production site in Clausthal-Zellerfeld

Gürsel Demircali, Chief Commercial Officer of Exentis Group AG: “The Exentis 3D technology platform enables Whitecell to manufacture millions of complex components for fuel cells. Our licensee benefits from a completely free choice of materials and maximum flexibility in further developing component designs. Additionally, the cold printing process used preserves materials and the environment. These advantages are unique and cannot be achieved in this combination with any other technology.”

### **About Exentis**

As a solution provider, Exentis has the only proprietary 3D technology platform worldwide that allows for industrial large-scale production. Industrialized Additive Manufacturing is universally applicable. For industrial or clean room applications. With free choice of materials, such as metals, ceramics, polymers, pharmaceutical or bio-printing products. The highly flexible 3D production technology combines rework-free component geometries with advantageous cost-benefit ratios. The cold printing process in use is sustainable and conserves materials as well as resources. Our customers, the Exentis 3D community members, can choose between exclusive in-house manufacturing under license agreements or having Exentis produce millions of applications for them as a contract manufacturer.
