

Press Release

Exentis has reached the *Aargau Business Award 2025* finals

- ◆ **First-time participation in the *Aargau Business Award***
- ◆ **Exentis among the three finalists in the “nationwide” category**
- ◆ **Public voting for the *Audience Award* now open**

Stetten, Switzerland, March 25, 2025 – Exentis Group AG, provider of the world’s only 3D technology platform enabling industrial large-scale manufacturing, is participating in the *Aargau Business Award* for the first time in 2025. Right from its debut, a distinguished jury has selected Exentis as one of the three finalists in the “nationwide” category.

Since 2007, the *Aargau Business Award* has been presented every year by Aargauische Kantonbank and the Aargau Trade Association to recognize the best companies based in the Canton of Aargau. The awards acknowledge outstanding entrepreneurial achievements that significantly shape and advance both the regional and national Swiss economy.

Gereon W. Heinemann, Chief Executive Officer of Exentis Group AG: “It is a great honor for Exentis to be selected as one of the three finalists for the *Aargau Business Award 2025*. This recognition is a true testament to the outstanding work our entire team delivers every single day.”

In early April, Exentis will undergo a thorough evaluation by an independent five-member expert jury during a visit to the Exentis head office and 3D Innovation Center in Stetten. The award ceremony will take place on April 24, 2025, at the Emil Frey Classics AG Event Center in Safenwil.

In the event of a victory, Exentis will donate its prize money to the nonprofit organization *Caritas Aargau* to provide financial support for people affected by poverty and social disadvantage in the Canton of Aargau. Furthermore, Exentis will support its employees in engaging in volunteer work for this organization.

In addition to the *Business Award*, Aargauische Kantonalbank has introduced a special *Audience Award*: a company celebration worth up to CHF 10,000 as a token of appreciation for the employees. The winner of the *Audience Award* will be determined through public voting. Please support Exentis and its employees with your vote by April 21, 2025, via the following link:

About Exentis

As a solution provider, Exentis has the only proprietary 3D technology platform worldwide that allows for industrial large-scale production. Industrialized Additive Manufacturing is universally applicable. For industrial or clean room applications. With free choice of materials, such as metals, ceramics, polymers, pharmaceutical or bio-printing products. The highly flexible 3D production technology combines rework-free component geometries with advantageous cost-benefit ratios. The cold printing process in use is sustainable and conserves materials as well as resources. Our customers, the Exentis 3D community members, can choose between exclusive in-house manufacturing under license agreements or having Exentis produce millions of applications for them as a contract manufacturer.
